

Designed to perform.
Engineered to last.

Window & Door Systems for Projects That Matter

Hunter Windows delivers high-performance, fully compliant aluminium window and door systems for commercial, architectural and residential projects of scale.

From complex façades to Class 2 high-rise developments, we provide custom solutions backed by deep technical expertise, local manufacturing, and a commitment to quality.

Darby Plaza - Newcastle East

Your Project Delivery Partner

We understand what drives your project — time, compliance, performance, and budget. Hunter Windows is your proactive partner through every phase, offering:

- In-house engineering, manufacturing and installation
- Shop drawings and design collaboration
- Program-aligned delivery and installation staging
- Proven track record across high-rise, mixed-use and complex builds
- Responsive service with a solutions-first mindset

NSW RAB Act Compliance

Design-Aligned. Certified. Traceable.

As window and door systems are classified as building elements under the NSW Residential Apartment Buildings (RAB) Act and Design & Building Practitioners (DBP) Act, compliance is critical from the outset.

We support regulated projects with:

- Regulated design documentation for DBP lodgement
- Performance data aligned to NCC/BCA requirements
- Full traceability from design through fabrication to install
- Certified systems (AS2047, BAL, Acoustic, WERS)
- Successful delivery across multiple Class 2 developments

Hunter Windows reduces risk across your façade package — and helps ensure a smooth pathway to occupation certificate.

Our Range

Windows

Thermally efficient, structurally rated, and aesthetically versatile. All systems are Australian designed and certified.

Doors

Sliding, stacking, hinged or bi-fold — our door systems combine strength, accessibility and style.

Hardware

We supply premium, architecturally designed hardware including ANDO™, ICON™, MIRO™ and Truth™, with stainless and colour-matched finishes.

Custom Made. No Compromise.

Every Hunter Windows product is made-to-measure to suit your specific project needs — with no standard sizes, just tailored solutions built for performance and compliance.

- Oversized glazing and clean, architectural lines
- Thermally broken and double-glazed options
- Acoustic and bushfire-rated systems
- Vast colour and finish choices
- Designed and engineered for both appearance and performance

Why Hunter Windows?

- 100% Australian designed and manufactured
- NCC, AS2047, BAL40 and acoustic certified
- WERS and NatHERS performance rated
- End-to-end service: design, supply and install
- Trusted by leading builders, architects and developers
